TITLE	Student Source Survey, Summer and Fall Terms, 1981. First Time Entering Freshmen [and] Transfer Students. Alabama Public Senior Institutions.
INSTITUTION	Alabama State Commission on Higher Education, Montgomery.
PUB DATE	Jul 83
NOTE	244p.
PUB TYPE	Statistical Data (110) -- Reports - Research/Technical (143) -- Tests/Evaluation Instruments (160)
EDRS PRICE	MF01/PC10 Plus Postage.
DESCRIPTORS	College Freshmen; *College Transfer Students; *Enrollment Trends; Foreign Students; *Geographic Distribution; Higher Education; In State Students; Out of State Students; *Private Colleges; *Publiccolleges; *Racial Distribution; School Location; State Colleges; State Universities; Two Year Colleges
IDENTIFIERS	*Alabama

ABSTRACT

Results of the fall 1981 Student Source Survey of the Alabama Commission on Higher Education are presented. The geographic locations of the public senior and junior colleges and private senior and junior colleges are shown with maps. Data are provided on: the relative participation of first-time entering (FTE) freshmen by county, FTE-freshmen as a percent of high school graduates, and the counties supplying FTE-freshmen for 14 colleges and universities. For each of the 14 institutions, data are provided for 1972, 1975, and 1981 on: total undergraduate enrollment, total FTE-freshmen enrollment, number of in-state and out-of-state FTE-freshmen, number of FTE-freshmen from home and adjoining counties, and foreign FTE-freshmen enrollment. For each institution, data are also included on the number of transfer students, including in-state and out-of-state transfers, along with the sector from which the student transfered. Additional information includes: the percentage of white and black FTE-freshmen by county and by institution, the percentage of white and black transfer students. The survey instrument is appended, along with summary statistics on the responses. (SW)

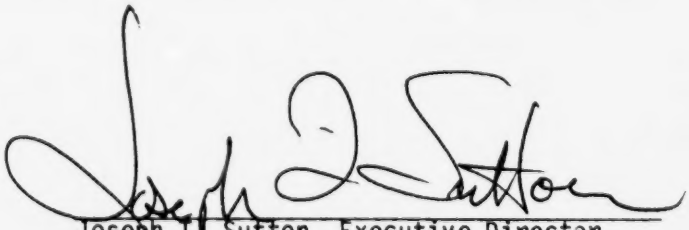
FOREWORD

No facts about a college or a university are more relevant to institutional planning than those describing the student clientele. Enrollment trends, full-time/part-time ratios, etc., are all important considerations in the planning and evaluation of higher education programs. The geographical origin of entering students is of special significance in understanding the current market for instructional services, participation indices, and access to educational opportunity.

This report presents student source information obtained from surveys conducted by the staff of the Commission on Higher Education in the past few years. Major assistance in developing and publishing the report was provided by Dr. John Porter, visiting professor of higher education, University of Alabama; Mrs. Kay Staub, director of institutional research, University of Alabama; Dr. Gerald Leischuck, director of institutional analysis, Auburn University; and Ms. Joan McGraw, research assistant, Auburn University.

The Commission expresses its deep appreciation to them and to the institutions for their cooperation in providing raw data.



Joseph T. Sutton, Executive Director
Alabama Commission on Higher Education

INTRODUCTION

This report presents the results of the Student Source Survey conducted by the Commission in the fall of 1981. The purpose of this survey was to determine the geographical distribution, by race, of the sources of first time entering undergraduate students, freshmen and transfers, for each of the several Alabama universities.

Two previous Student Source Surveys were conducted by the Commission in 1972 and 1975. The prior surveys did not contain information on the race of entering students but did extend to graduate students entering the universities and first time entering freshmen for the states public junior/community colleges.

The primary purpose of the 1981 survey was to provide current data for the Commission and the institutions for planning purposes. The Commission had initiated a long range planning effort in 1979 for the period 1980-85. In January 1981, the United States Office of Civil Rights released the findings of their study, initiated in 1978, to determine whether there remained vestiges of a dual system of higher education in Alabama. The findings indicated that such vestiges did remain and requested a plan for the elimination of such. Inasmuch as the 1981 OCR report did not include the public two year institutions, these institutions were not included in the 1981 Student Source Survey.

The 1981 Survey Instrument is reproduced in Appendix A. A summary of the responses is presented in Appendix B.

Information was requested concerning graduate students. The several institutions varied in their ability to respond to this request, resulting in incompatible data, hence no analyses are presented.

The earlier surveys, in conjunction with the 1981 survey, provide data for trend analyses over the period 1972-81. Such trends are presented as appropriate.

The Higher Education General Information Survey, Opening Fall Enrollments, (HEGIS 2300-2.3A) provides data with regard to race for first time entering freshmen for the even years 1796-80, a summary of which is presented in Appendix C. These data, together with the 1981 survey, provide for trend analyses with regard to race for the period 1976-81 but without regard to origin of the students. These trends are also presented as appropriate.

In order to provide a clearer picture of patterns, relative distributions have been presented rather than raw numbers. Thus, to convey the distribution of the first time entering freshmen (FTEF) among the counties for a given institution, the percentage of the total FTEF for that institution from each county is provided on a map. The raw numbers for the calculations are found in Appendix B.

Appendix D presents the distribution of each counties' FTEF among the several institutions.

In addition to the data contained in Appendices B and C, data from the 1980 Census and Statistical Abstracts were used in deriving some conclusions.

PART I

The Institutions

THE INSTITUTIONS

There are fourteen accredited senior institutions in Alabama. In addition the Commission recognizes several branch campuses of institutions. These include the branch of the University of Alabama in Gadsden, the Cooperative Upper-Division Program at Gadsden State Junior College operated by the University of Alabama and Jacksonville State University and the four branch campuses of Troy State University at Montgomery, Dothan, Phenix City, Baldwin County (Bay Minette).

Athens State College is an upper division institution and hence does not appear in the FTE Freshmen analyses. It does appear in the transfer analyses as do the public junior/community colleges, and private senior and junior institutions. For this purpose the names, abbreviations and locations of these institutions are also provided in the following pages.

Public Senior Institutions

Alabama A&M University	(A&M)
Alabama State University	(ASU)

PART II

Selected Characteristics of Alabama
and the Several Counties for First Time
Entering Freshmen

ON-GOING RATE - UNIVERSITIES

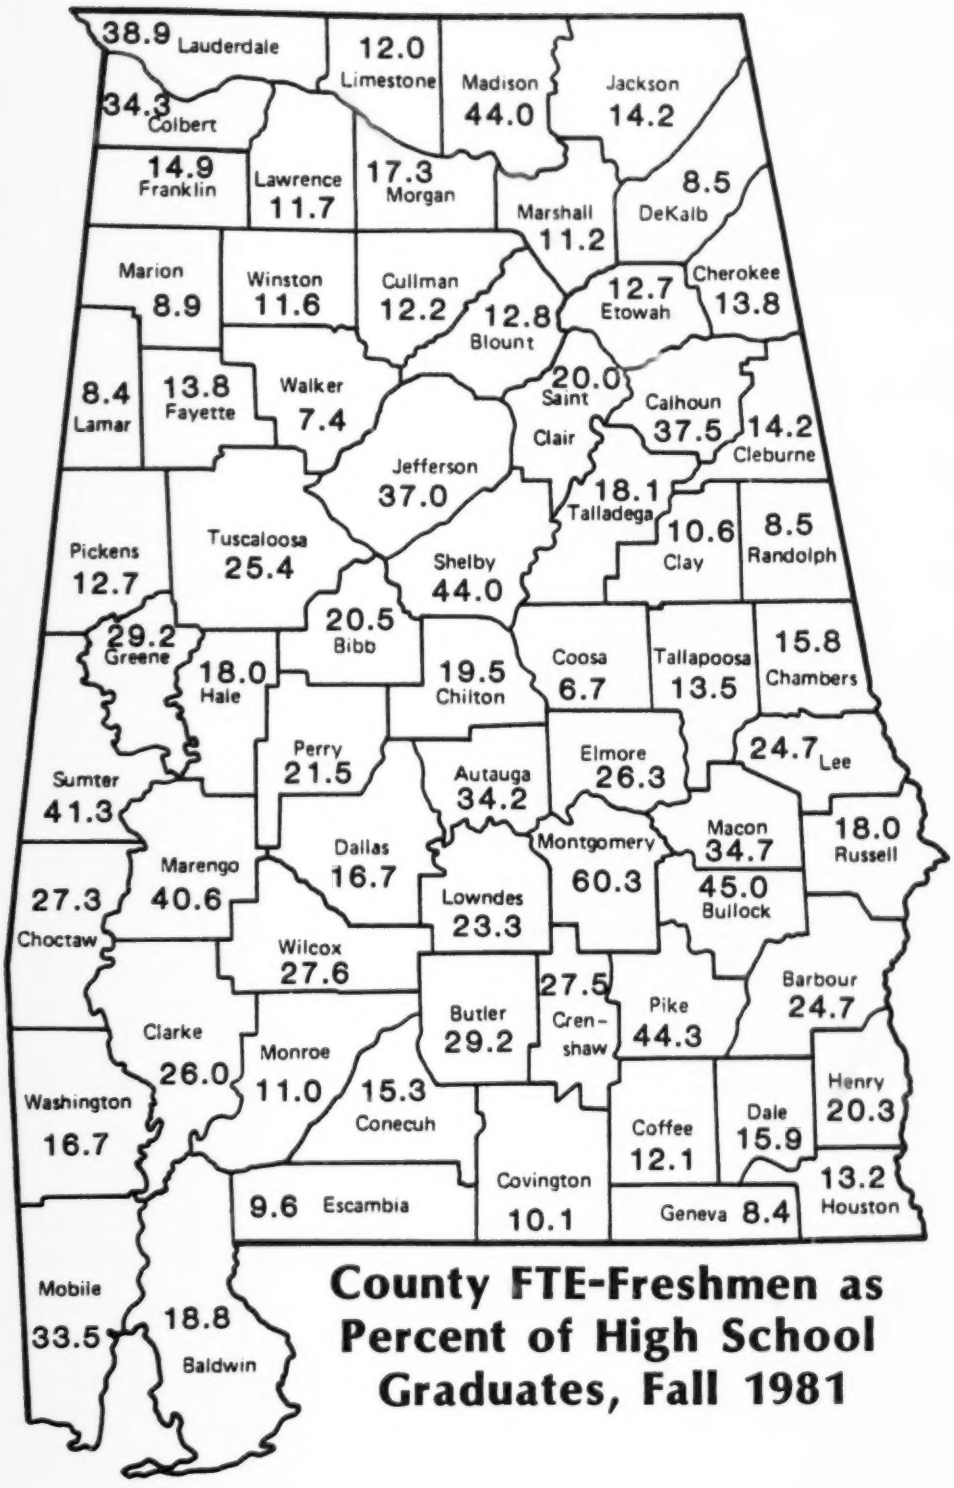
The on-going rate is the percentage that the number of FTEF is of the number of high school graduates. Although the FTEF group is not necessarily contained within the group of current year high school graduates it is felt that the derived figure is representative of the rate at which high school graduates enter the universities. Figures for each of the counties are shown on the opposite page.

High school graduates from private schools are not reported in Alabama, nor are those native students enrolling in other states. These factors produce errors in the derived results. It is assumed that the unreported private school graduates produce the largest error. Enrollment data from the Center for Business and Economic Research, University of Alabama for the private schools and similar data from the Alabama State Department of Education on public school enrollments indicate that the counties most largely affected by unreported private high school graduates are: Barbour, Bullock, Choctaw, Clarke, Dallas, Greene, Hale, Lowndes, Macon, Marengo, Pickens, Pike, Russell, Sumter and Wilcox. The effect is to produce an inflated on-going rate for these counties. The above information also indicates that the great majority of the unreported high school graduates are white.

The on-going rate for the state is 27.5%. Comparison with the individual counties shown opposite provides a range from 6.7% to 60.3%.

Home and contiguous counties of the universities are generally those whose rate is above the state rate while the more remote, rural counties tend to be below the state rate.

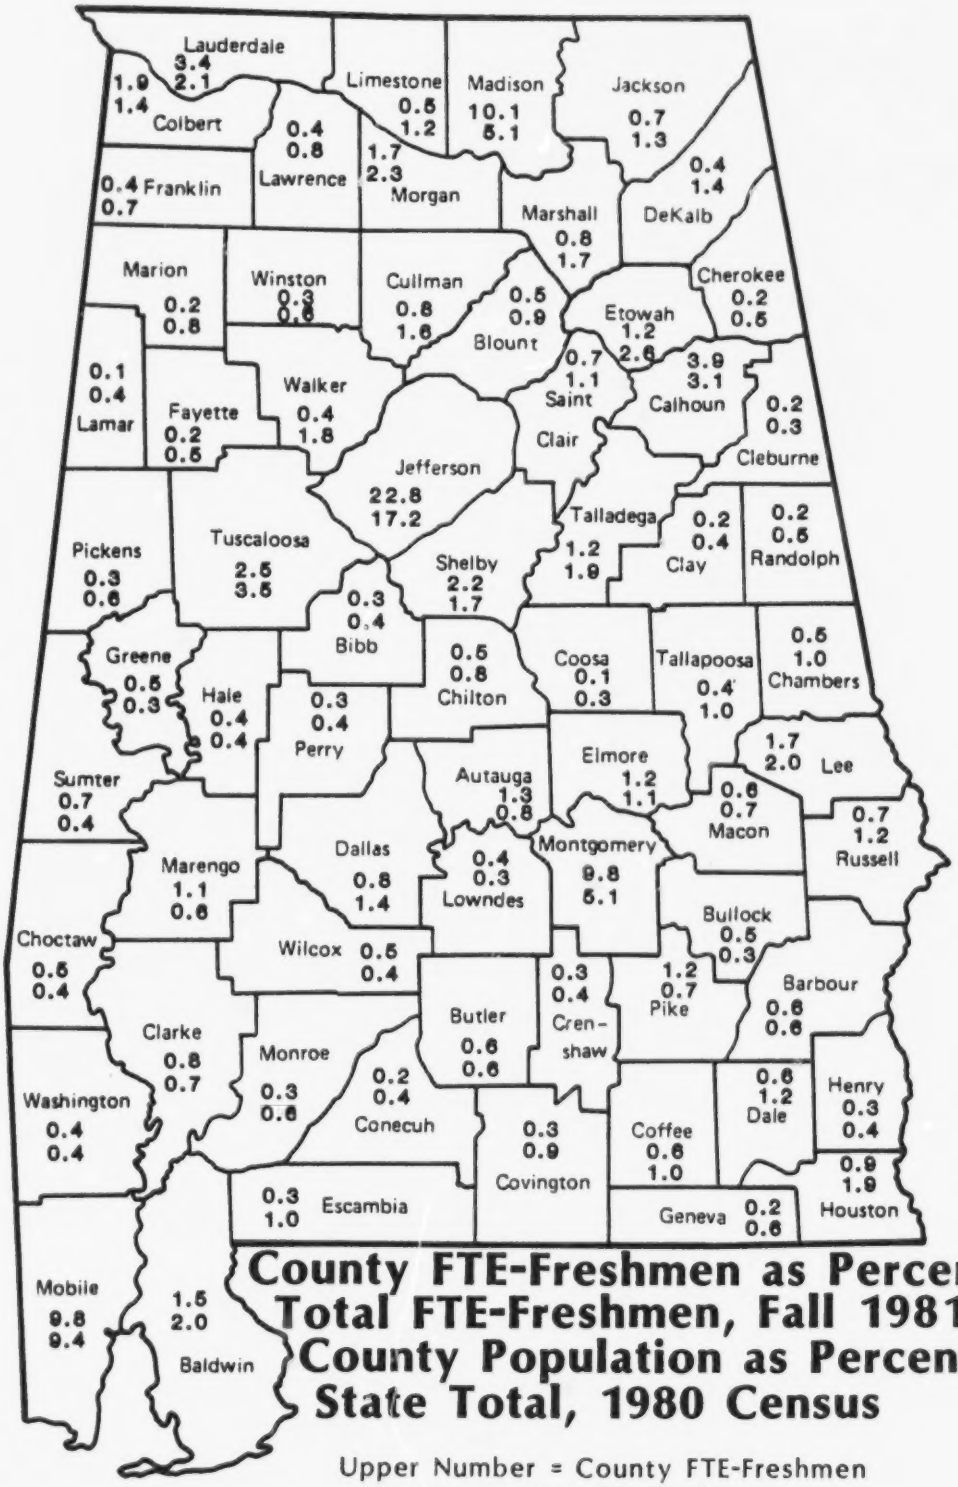
N.B. These figures include FTEF in universities only. Consideration of FTEF in Alabama's junior, community and technical colleges would be necessary to derive the on-going rate to all postsecondary institutions. Such figures are however not available for 1981.



County FTE-Freshmen as Percent of High School Graduates, Fall 1981

DISTRIBUTION OF THE 1981 FTEF CLASS BY COUNTY

The distribution of the 1981 FTEF class is shown on the opposite page. The upper figure in each county is the percentage of the 1981 FTEF class originating from that county. For comparative purposes the lower figure, the percentage of the state population, is provided.

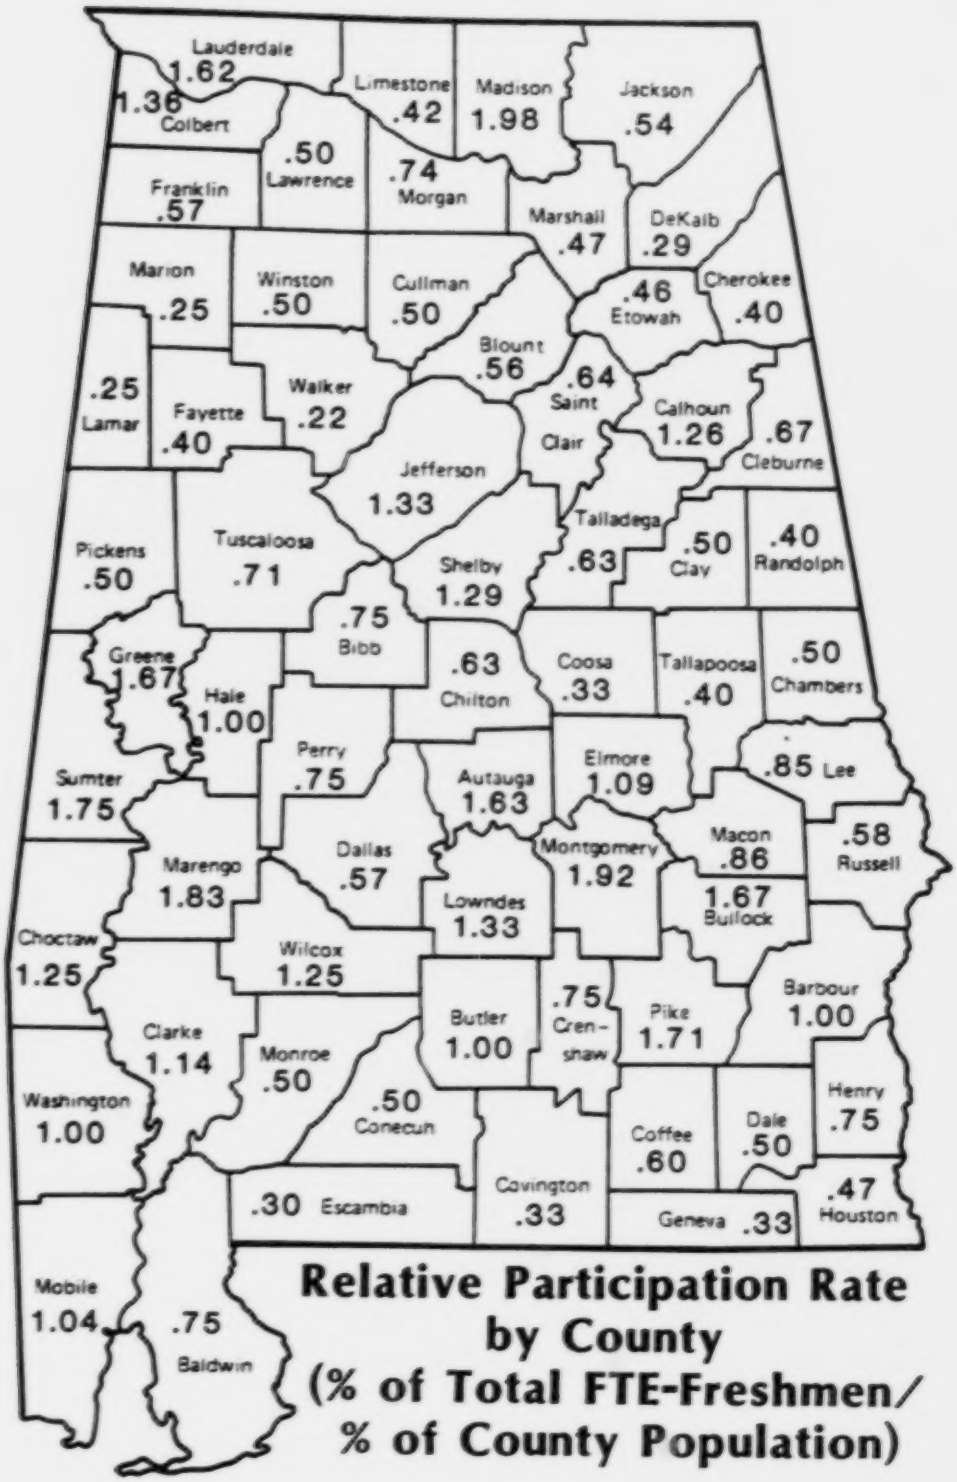


County FTE-Freshmen as Percent of Total FTE-Freshmen, Fall 1981
County Population as Percent of State Total, 1980 Census

Upper Number = County FTE-Freshmen
as % of Total FTE-Freshmen
Lower Number = County Population
as % of State Population

RELATIVE PARTICIPATION RATE

The relative participation rate for each county is shown opposite. The relative participation rate is obtained by dividing the percentage of FTEF for each county by the percentage of the population for each county. The relative participation rate then is a measure of the participation rate for each county compared to that of the state as a whole. Values greater than 1.0 indicate that residents of the county entered a university as freshmen at a greater rate than did residents of the state as a whole. There are 23 counties with rates greater than 1.0. These counties are generally those home and contiguous counties to the state universities with some exceptions and are generally those counties with high on-going rates.



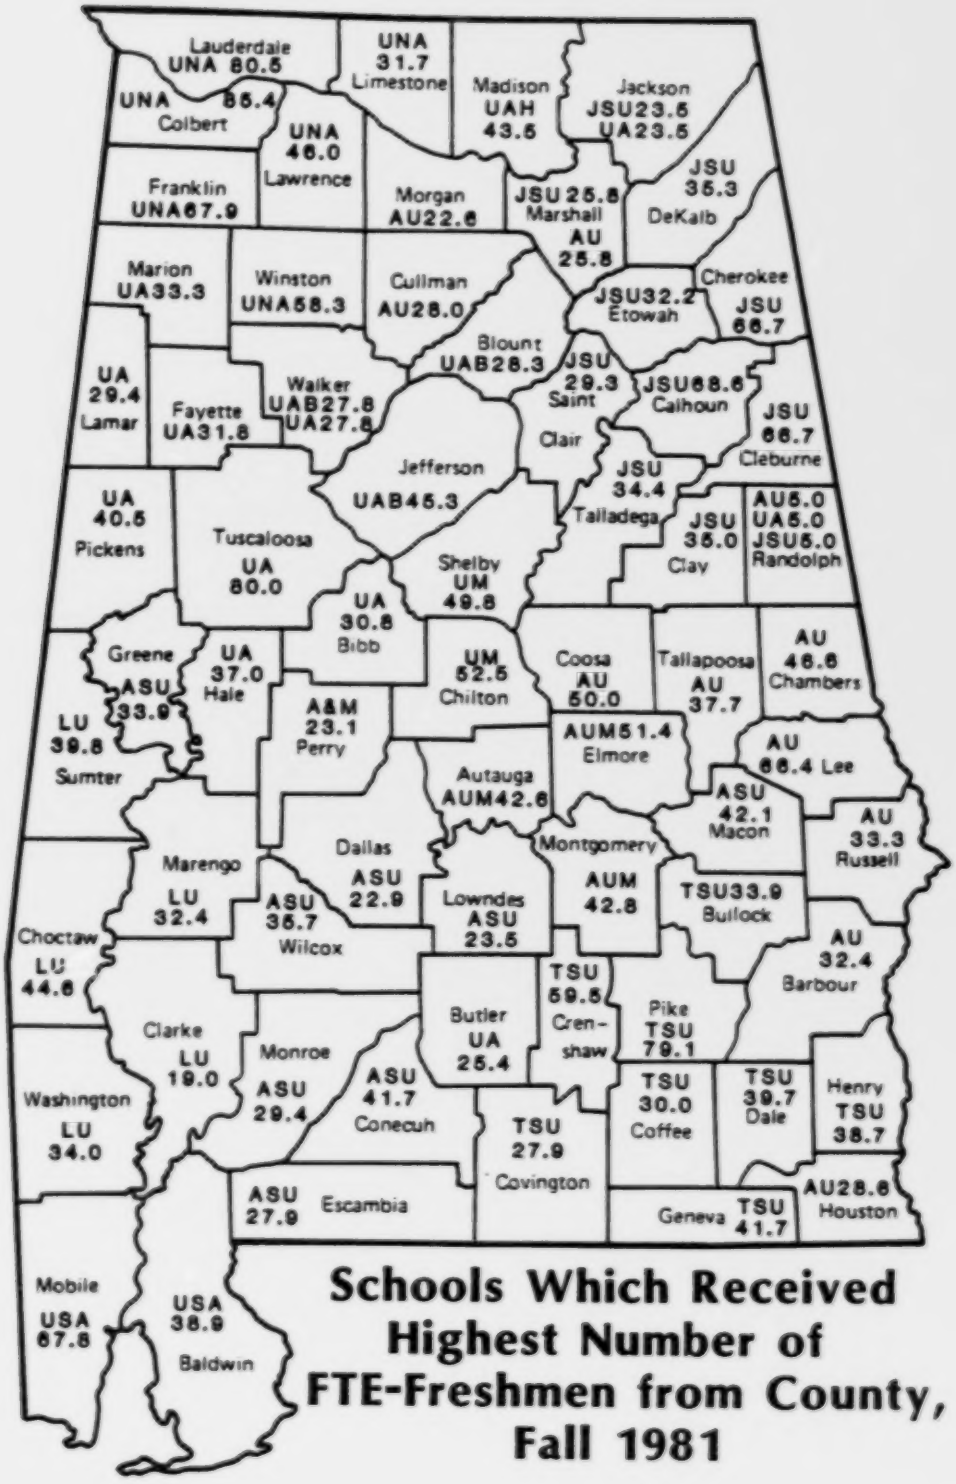
Relative Participation Rate by County (% of Total FTE-Freshmen/ % of County Population)

INSTITUTIONAL DRAW

Institutional draw is a measure of the relative number of FTEF from a given county entering the various institutions. The Institutions with the largest and second largest draw are shown on the following two maps. The figure for each county is the percentage of the FTEF from the county entering the designated institution. The opposite page shows the institutions with the largest institutional draw while the following page shows the institutions with the second largest draw.

LARGEST DRAW

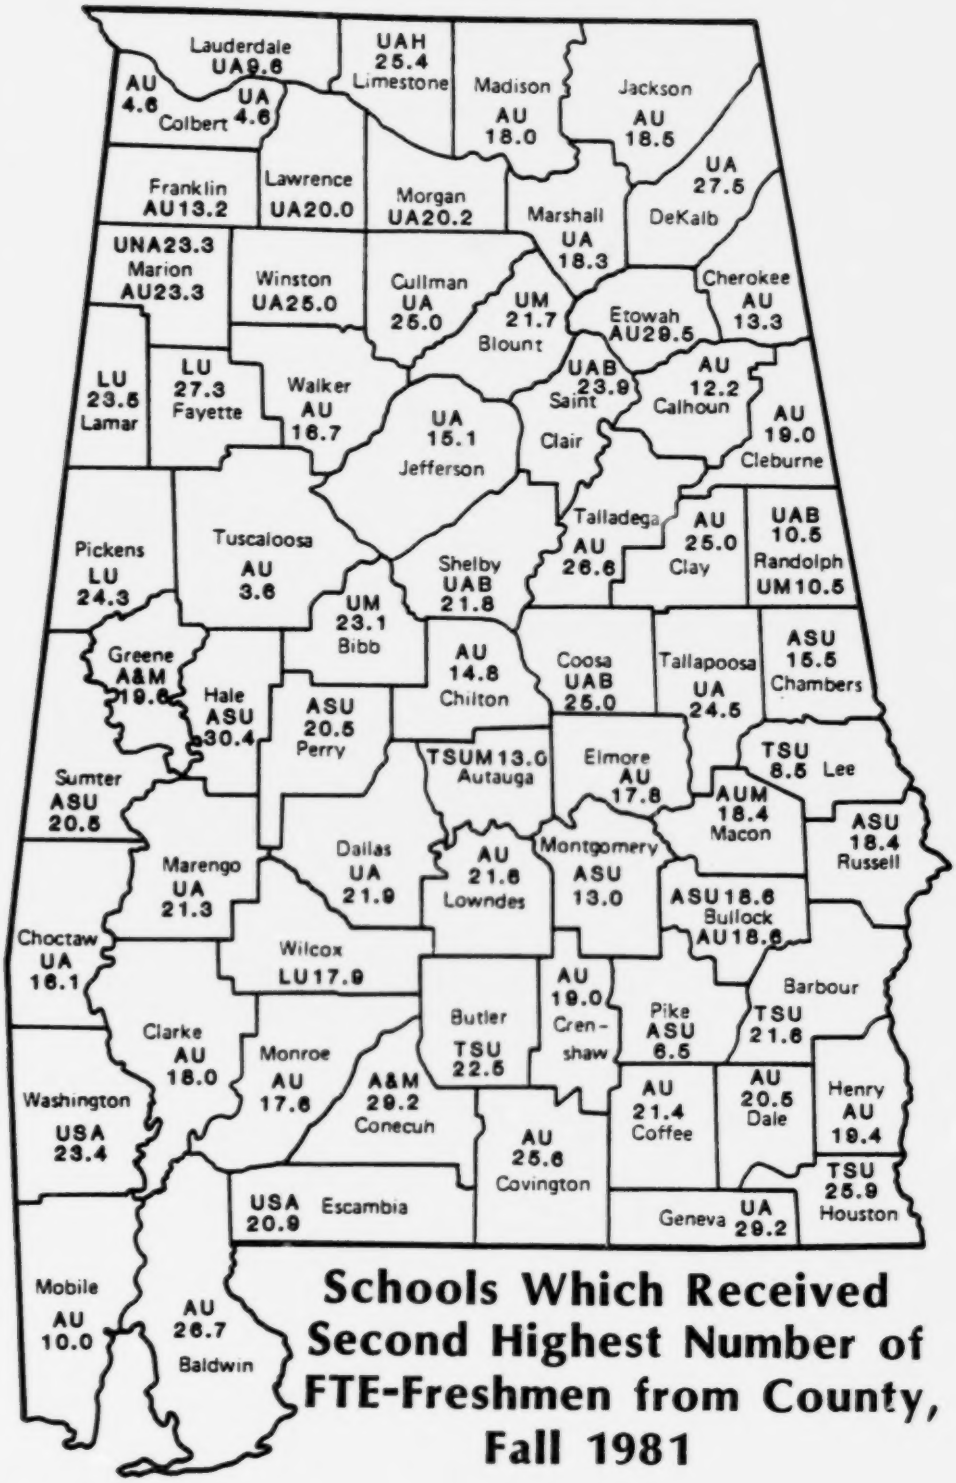
The on-going rates and relative participation rates have shown high rates for counties that are the home of a university and counties adjoining to these home counties. The institutional draw figures show that students tend to enter the institution in their home or neighboring county as seen on the opposite page. Obvious exceptions to this generalization are seen in the case of ASU in Conecuh, Escambia, Monroe and Wilcox counties and to a lesser extent in the case of A&M for Perry county.



Schools Which Received Highest Number of FTE-Freshmen from County, Fall 1981

INSTITUTIONAL DRAW - SECOND LARGEST DRAW

The figure for second largest draw shown opposite shows that AU and UA draw most heavily from non-home and contiguous counties. As in the case of largest draw, ASU and A&M also draw from more distant counties.



Schools Which Received Second Highest Number of FTE-Freshmen from County, Fall 1981

PART III

Selected Characteristics of Alabama and the Several Universities for First Time Entering Freshmen

RELATIVE DISTRIBUTION OF FTEF CLASS AMONG THE COUNTIES FOR THE SEVERAL UNIVERSITIES

The distribution among the counties of the 1981 FTEF class for each institution is shown beginning on the following page. The home county is indicated by a star and contiguous counties are shaded. The figure in each county is the percentage of the FTEF for the institution under consideration originating from that county.

N.B. Athens College enrolls only upper-division students and hence does not appear in this section.

GEOGRAPHIC DISTRIBUTION -- SOURCES OF FTEF -- TOTAL STATE

The opposite page summarizes the geographical distribution of the sources of FTEF for all universities for 1981. The following thirteen pages provide similar information for each institution. Figures are also provided for 1972 and 1975 FTEF for comparative purposes.

From 1975 to 1981, total undergraduate enrollments increased by 37.0% while the number of FTEF tended to stabilize. As a consequence the number of FTEF, relative to total undergraduate enrollments, decreased from 21.3% to 18.9% over the entire period.

Native (in-state) FTEF decreased from 84.4% to 78.2%. Of the native FTEF, the relative number from the home and adjoining counties increased from 52.3% to 56.7%. Out-of-state FTEF increased from 15.0% to 20.1%.

Foreign FTEF increased from 0.6% to 1.7%.

Thus, for the state as a whole, institutions tended to enroll more non-native FTEF while more native students tended to attend an institution in close proximity to their home.

FIRST-TIME ENTERING FRESHMEN

Statewide Total

	1972	1975	1981
Total Undergraduate Enrollment*	61,004	71,126	83,566

% of In-State FTE-Freshmen	52.3	56.3	56.7

*This figure includes Athens State College.

GEOGRAPHICAL DISTRIBUTION FTEF -- ALABAMA A&M

Total undergraduate enrollments at Alabama A&M University increased by 43% over the period, slightly higher than the state average with no decrease in the relative number of freshmen.

Out of state freshmen enrollments increased from 4.8% to 12.4% with foreign freshmen enrollments increasing from .2% to 18.8% resulting in a relative decrease of native students. In 1981 59.5% of the foreign FTEF in the state enrolled at Alabama A&M, accounting for a large part of the state increase.

The relative number of FTEF from the home and adjoining counties at A&M is less than half the state average. This figure did, however, show a slight increase over the period.

*All foreign students assumed to be non-resident aliens.

GEOGRAPHICAL DISTRIBUTION FTEF -- ALABAMA STATE UNIVERSITY (ASU)

Total undergraduate enrollments at ASU increased by 33.8% over the period with a slight increase in the relative number of freshmen.

Native FTEF enrollments decreased from 92.9% to 81.3% but are still slightly higher than the state average.

Out-of-state enrollments increased from 7.1% to 18.0% but remain below the state average.

Enrollments from the home and adjoining counties, decreased over the period, counter to the statewide trend and were approximately 60% of the state average.

FIRST-TIME ENTERING FRESHMEN

Alabama State University

*All foreign students assumed to be non-resident aliens.

GEOGRAPHICAL DISTRIBUTION FTEF -- AUBURN UNIVERSITY (AU)

The total enrollment increase for Auburn University over the period was 31%, slightly lower than the state average.

The number of native students decreased from 69.6% to 62.3%, a level well below the state average.

The relative number of FTEF from the home and adjoining counties decreased from 14.5% to 12.0%, a level almost 80% less than the state average.

Out-of-state FTEF students increased from 29.8% to 37.5%, a level well above the state average.

GEOGRAPHICAL DISTRIBUTION FTEF -- AUBURN UNIVERSITY AT MONTGOMERY (AUM)

Total enrollments for AUM, a relatively young institution, increased by 85% during the period.

The native FTEF enrollment has remained high at 92.9% for 1981, well above the state average.

The relative number of FTEF from home and adjoining counties decreased from 96.4% to 92.7% but remains significantly above the state average.

GEOGRAPHICAL DISTRIBUTION FTEF -- JACKSONVILLE STATE UNIVERSITY (JSU)

The total enrollment for JSU increased by only 15.9% for the period, a rate less than half the rate for the state. The relative number of freshmen has decreased slightly.

The relative number of native FTEF students decreased from 91.2% to 82.2% but remains slightly higher than the state average.

The relative number of native students from home and adjoining counties increased from 36.8% to 53.8%, a level slightly below the state average.

Out of state enrollments increased from 7.7% to 17.6% and remain slightly below the state average.

GEOGRAPHICAL DISTRIBUTION FTEF -- TROY STATE UNIVERSITY/MONTGOMERY (TSUM)

Total enrollments at TSUM increased at the average state rate. The relative number of freshmen increased slightly from 19.3% to 21.2%, a level slightly above the state level.

The relative number of native FTEF decreased from 63.0% to 52.8%.

The relative number of native FTEF from home and adjoining counties increased from 77.2% to 91.2%, well above the state average.

The relative number of out-of-state FTEF has increased from 36.1% to 44.8%, a level well above the state average.

The above remarks should be qualified by the observation that many of the students enrolled at TSUM are Air Force personnel from Maxwell Air Force Base and thus may not be able to qualify for state residency.

PART IV

Selected Characteristics of Alabama and the Several Institutions for Transfer Students

SOURCES OF TRANSFER STUDENTS -- TOTAL STATE

The opposite page summarizes the sources of transfer students for all universities for 1981. Figures are also provided for 1972 and 1975 for comparative purposes.

Over the period 1972-1981 the number of transfer students, relative to the total undergraduate enrollment, decreased from 13.3% to 9.2%. This decrease occurred in both in-state and out-of-state transfer students.

Of the total transfer students the proportion from in-state increased slightly. Of these, transfers from public junior colleges increased while those from public senior, private senior and private junior decreased.

The following fourteen pages provide the same information for the fourteen senior institutions individually.

TRANSFER STUDENTS BETWEEN AND AMONG SENIOR INSTITUTIONS

Transfer students among the senior institutions comprise 2.3% of the total undergraduate population of these institutions and are shown on the opposite page. Of the fourteen main campuses listed, six received a net gain in transfers while eight received a net loss in transfers.

Similar figures are presented on the following three pages for public junior, private senior and private junior institutions.

TRANSFER STUDENTS FROM PUBLIC JUNIOR/COMMUNITY COLLEGES

The following page displays the transfers from the public junior/community colleges to the several universities. The average transfer rate for junior college students is 8.21% with eleven of the twenty one junior colleges having a rate greater than the average. A summary of the distribution of these transfers to the several universities is also provided.

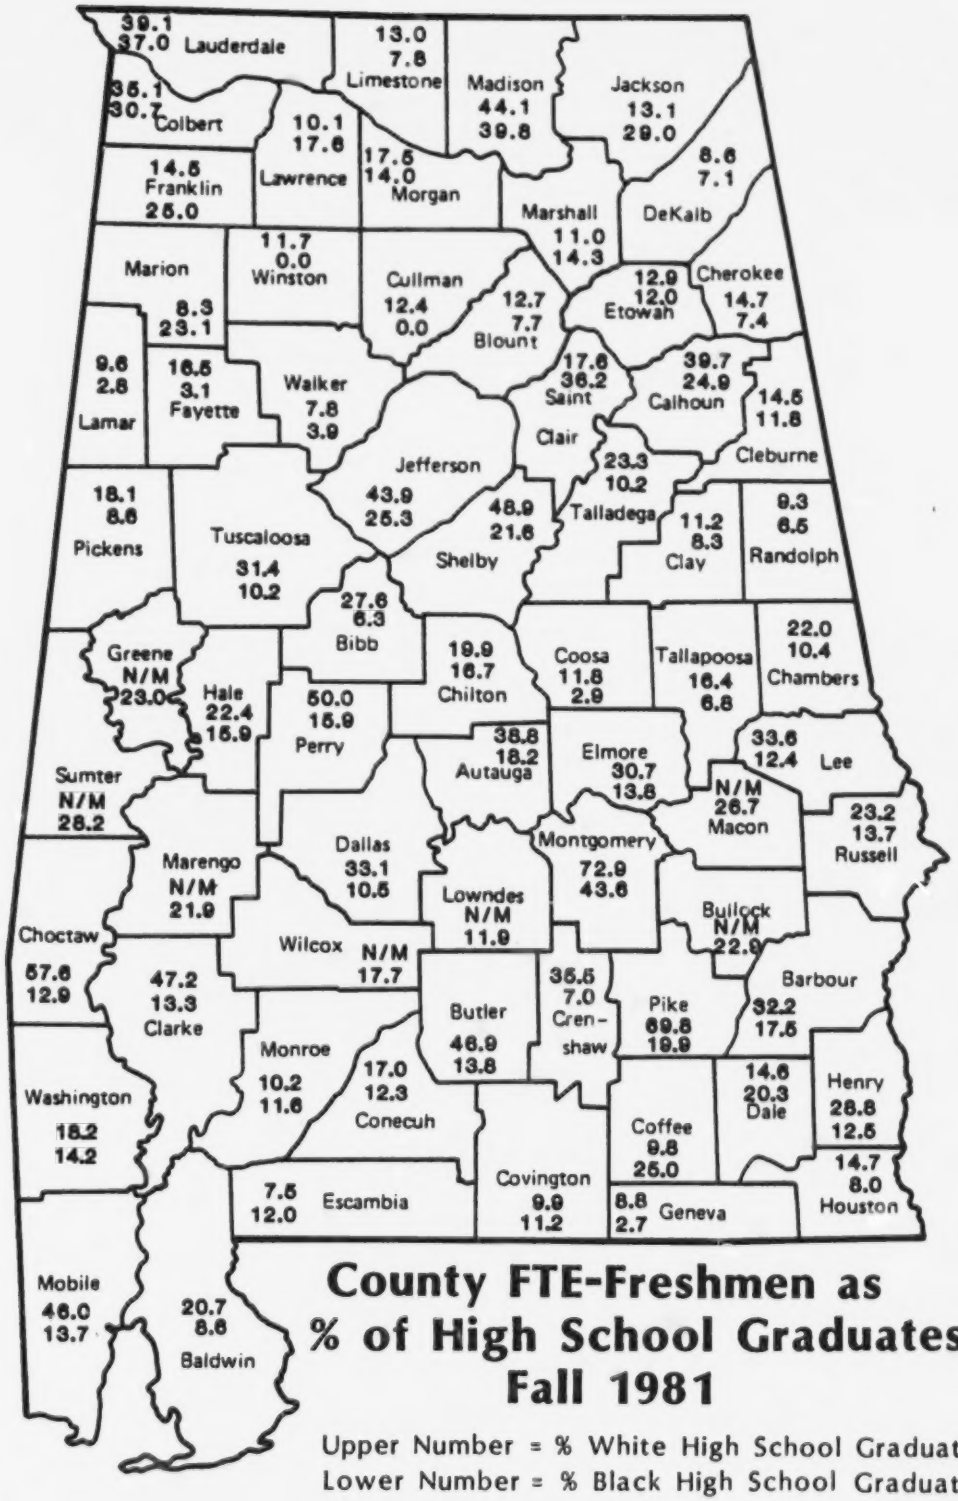
PART V

Selected Characteristics of the Racial
Distribution of First Time Entering
Freshmen for Alabama and the Several Counties

ON-GOING RATE -- UNIVERSITIES -- BY RACE

As in the earlier section, the on-going rate is defined as the percentage that the number of FTEF is of the number of high school graduates. Figures for each of the counties by race are given on the opposite page. The upper figure refers to white FTEF and the lower to black FTEF.

As mentioned in the earlier section, the number of graduates from private schools is not known, leading to artificially exagerated on-going rates for some counties. Some rates exceed 100% and are indicated by N/M on the opposite page.

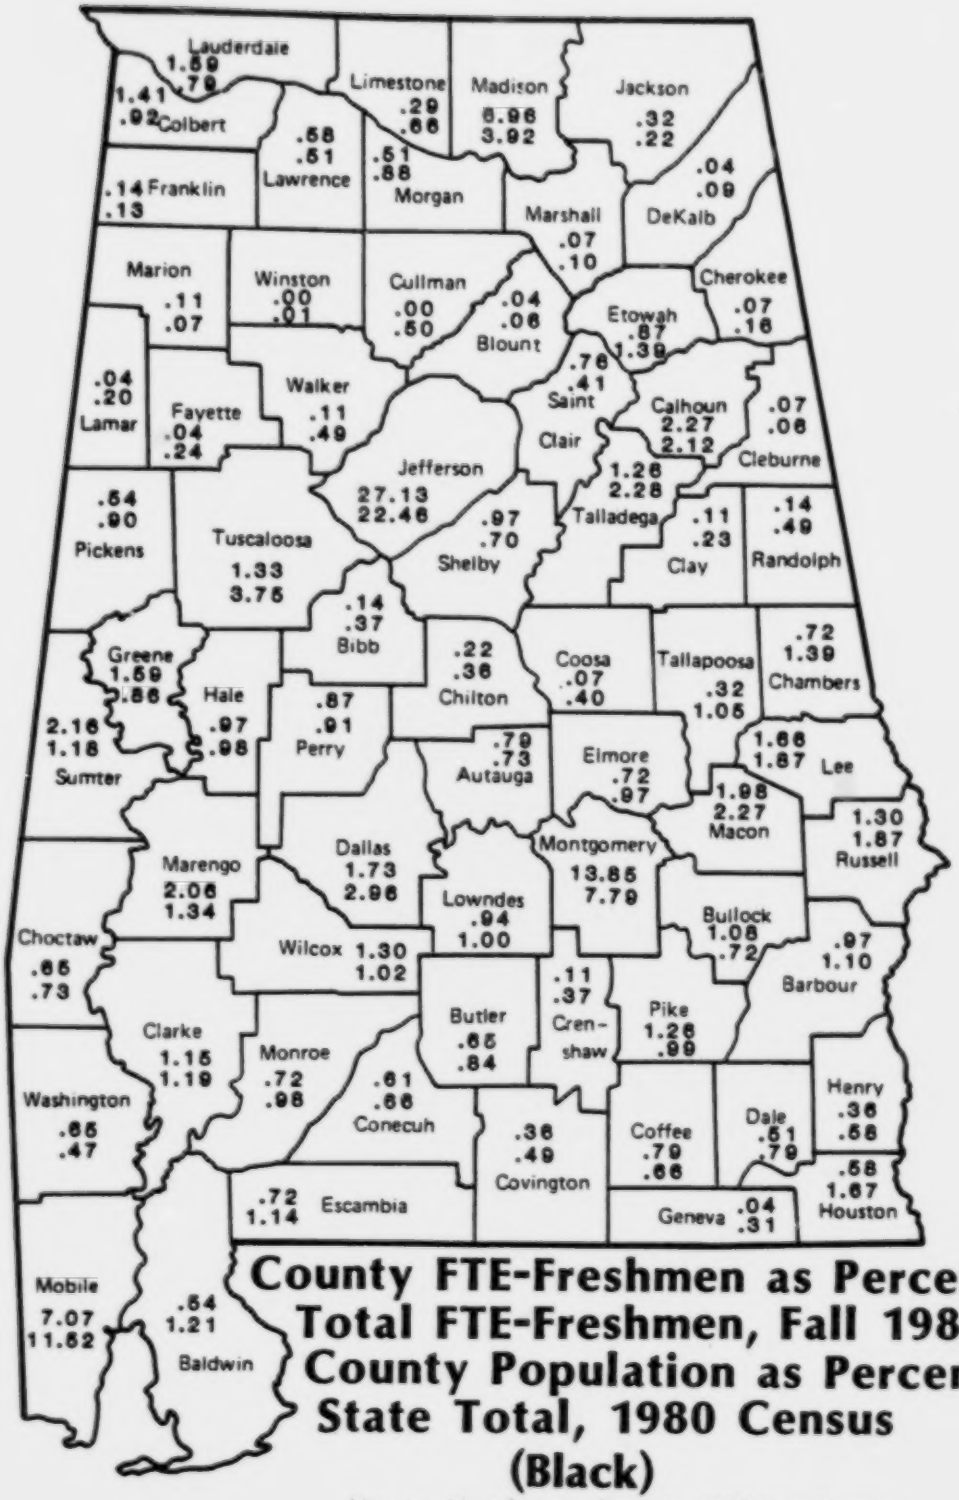


County FTE-Freshmen as % of High School Graduates, Fall 1981

Upper Number = % White High School Graduates
Lower Number = % Black High School Graduates
N/M = Not Meaningful

DISTRIBUTION OF BLACK FTE FRESHMEN BY COUNTY

The distribution of the 1981 Black FTEF class is shown on the opposite page. The upper figure in each county is the percentage of the black FTEF originating from that county. The lower figure, the percentage of the total state black population (1980 census), is provided for comparative purposes.

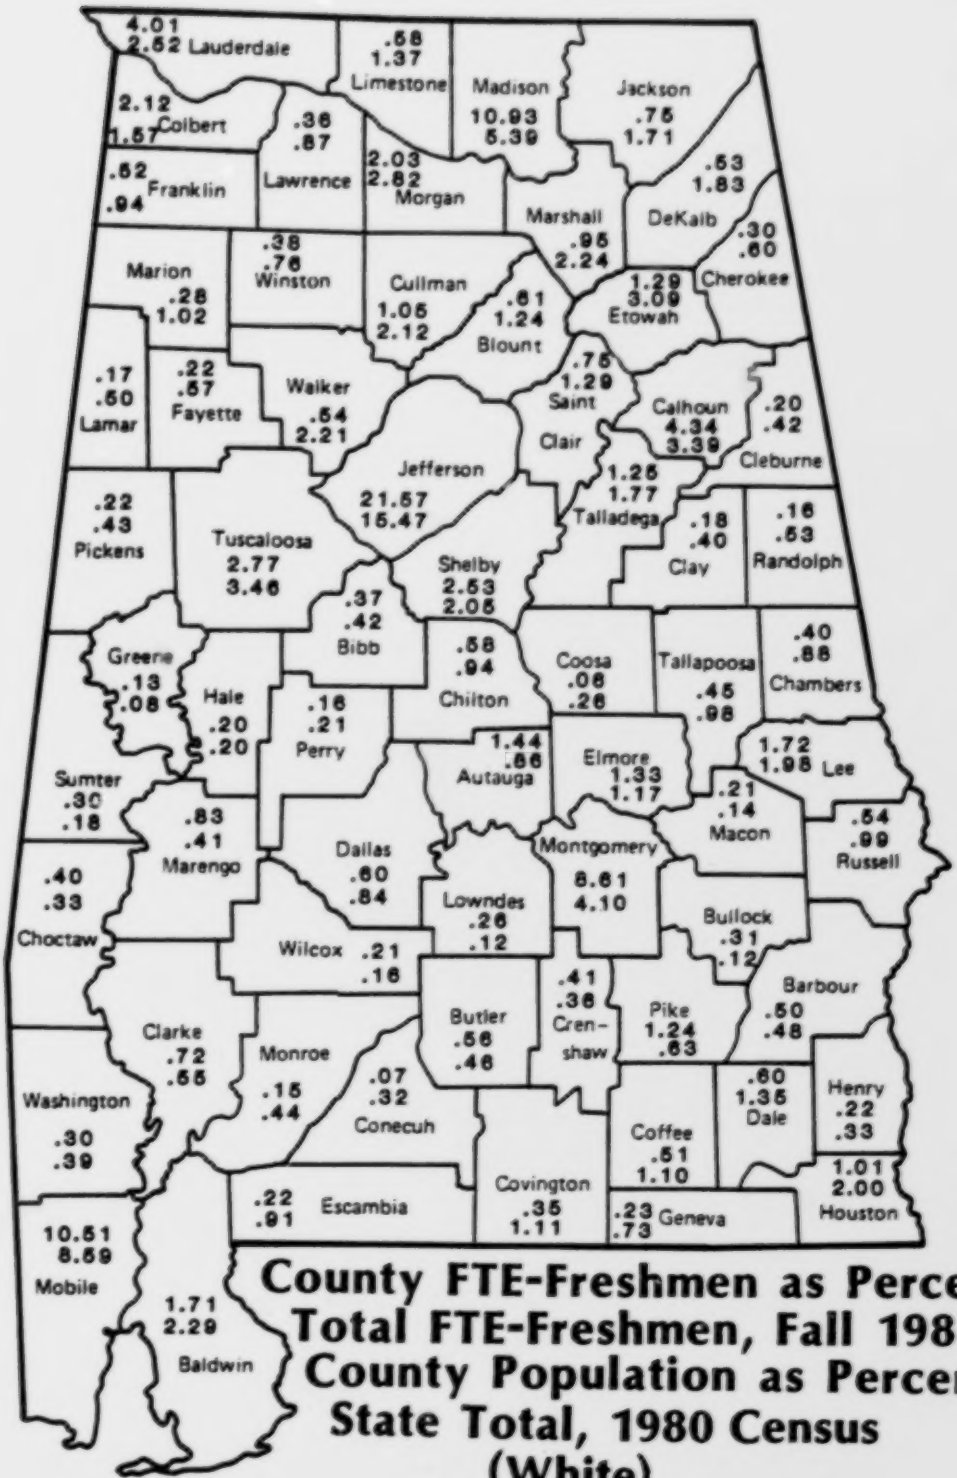


County FTE-Freshmen as Percent of Total FTE-Freshmen, Fall 1981
County Population as Percent of State Total, 1980 Census
(Black)

Upper Number = County FTE-Freshmen
as % of Total FTE-Freshmen
Lower Number = County Population
as % of State Population

DISTRIBUTION OF WHITE FTE FRESHMEN BY COUNTY

The distribution of the 1981 white FTEF class is shown on the opposite page. The upper figure is the percentage of the white FTEF originating from that county. The lower figure, the percentage of the total state white population (1980 census), is provided for comparative purposes.

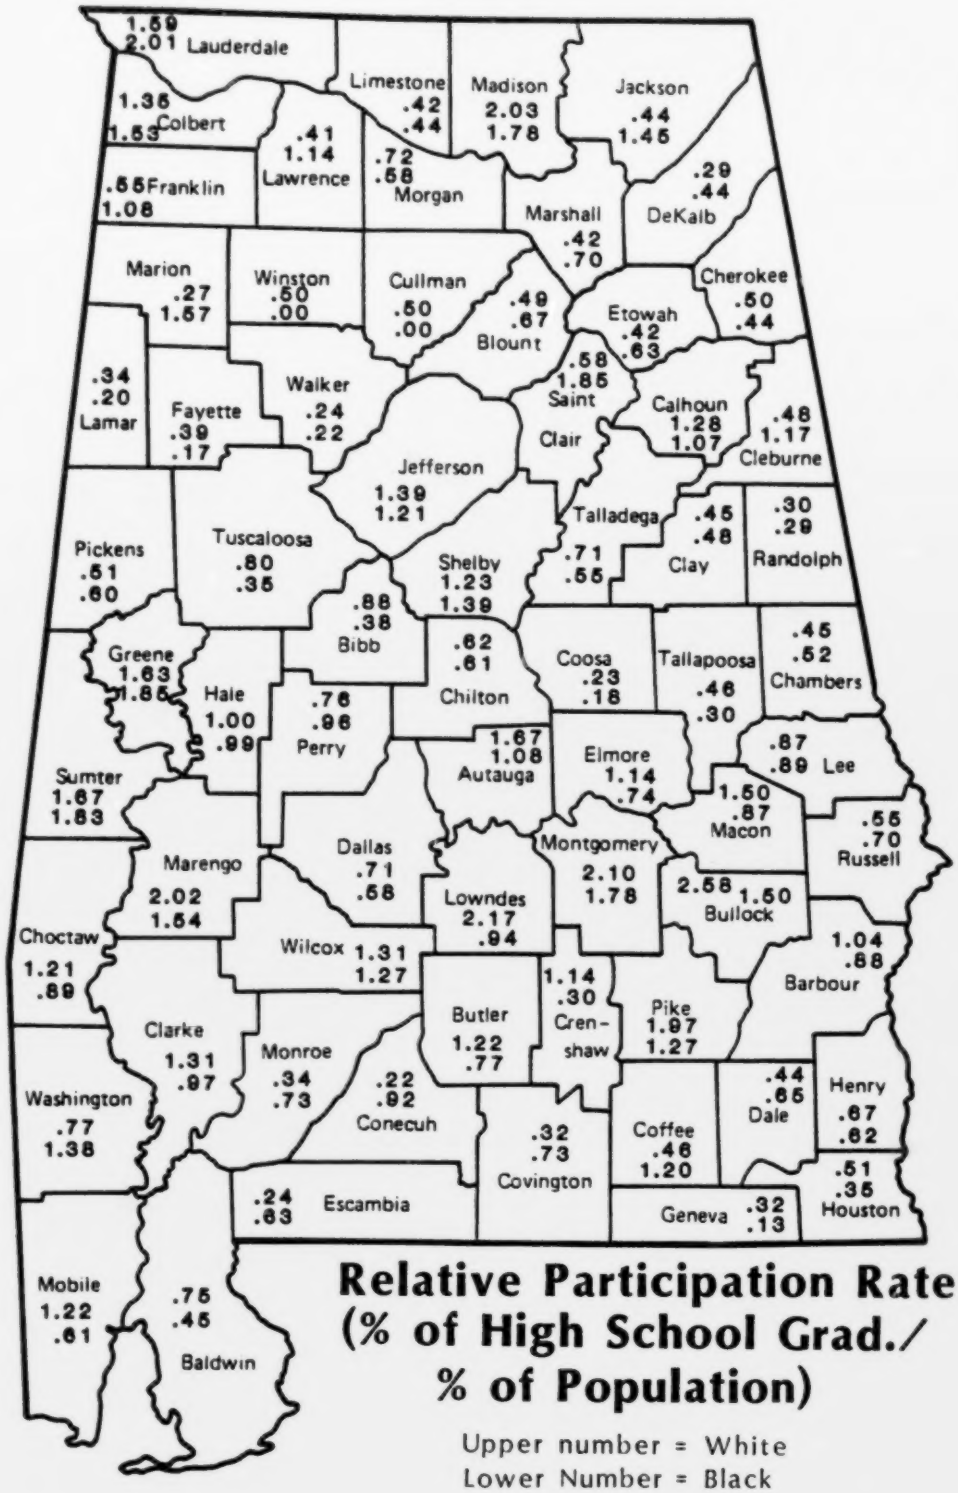


County FTE-Freshmen as Percent of Total FTE-Freshmen, Fall 1981
County Population as Percent of State Total, 1980 Census
(White)

Upper Number = County FTE-Freshmen
as % of Total FTE-Freshmen
Lower Number = County Population
as % of State Population

RELATIVE PARTICIPATION RATE BY RACE

The relative participation rate by race is shown on the opposite page. The relative participation rate is obtained by dividing the percentage of FTEF by the percentage of the population for each county, by race. As earlier, the relative participation rate is a measure of the participation rate for a given county compared to that of the state as a whole. Values greater than 1.0 indicate that the residents of that county entered a univeristy as freshmen at a greater rate than did residents of the state as a whole. The absolute participation rate for white freshmen was 3.3 FTEF/1000 population and the absolute participation rate for black freshmen was 2.8 FTEF/1000 population.



Relative Participation Rate (% of High School Grad./ % of Population)

Upper number = White
Lower Number = Black

PART VI

Selected Characteristics of the Racial
Distribution of First Time Entering Freshmen
for Alabama and the Several Institutions

GEOGRAPHICAL DISTRIBUTION OF FALL 1981 FTEF BY RACE

The geographical distribution of the Fall 1981 FTEF class is shown by race on the opposite page for the state as a whole. The following fifteen pages provide the same information for the individual campuses.

For the state as a whole the relative number of native black FTEF (85.5%) is higher than that of native white FTEF (78.0%). This trend is generally followed by the individual campuses with a few minor exceptions.

FIVE YEAR TREND IN BLACK/WHITE FTEF

BY INSTITUTION

The opposite page shows the first time entering freshmen according to race, black (non-hispanic) and white (non-hispanic). Non-resident aliens are not included. Data for each institution are shown as well as totals for all institutions for opening fall FTEF enrollments for 1976, 1978, 1980 and 1981.

Over the five year period total FTEF decreased by 9.0% with black FTEF decreasing by 3.1% and white by 12.7%. As a result, the relative number of black FTEF increased from 19.3% in 1976 to 20.9% in 1981.

In 1976 a majority of the black FTEF, 53.6%, entered a predominantly black institution Alabama A&M University or Alabama State University. By 1981 this situation had reversed itself with a majority, 53.5%, of the black FTEF entering a predominantly white institution.

PART VII

Selected Characteristics of the
Racial Distribution of Transfer Students
for Alabama and the Several Institutions

SOURCES OF TRANSFER STUDENTS -- TOTAL STATE BY RACE

The opposite page summarizes the sources of undergraduate transfer students by race for all campuses for 1981. Similar information is provided for the individual institutions on the following fifteen pages.

As in the case of FTE Freshmen, relatively more black transfer students are natives than are white transfer students. Likewise a relatively higher proportion of the black transfer students originate from public junior/community colleges, with both black and white transfer students from public junior/community colleges constituting the largest group of transfer students.

Of the total of 223 black transfer students among the senior institutions, 15.2% (34) transferred to a predominantly black institution. Of the 1,709 white transfer students among the senior institutions only 0.2% transferred to a predominantly black institution.

A similar pattern is displayed by transfer students from the public junior/community colleges. Of such black transfer students 18.7% moved to a predominantly black senior institution while only 0.3% of such white tranfer students moved to a predominantly black institution.

MEMORANDUM

TO: Presidents of Public Senior Institutions

FROM: William D. Carr *William D. Carr*

RE: Student Source Survey: Fall, 1981

In an effort to update our student flow information, we are undertaking a study similar to the 1975 Student Source Survey, and ask your assistance in providing the data for students at your institution. The results of this updated information will be helpful in developing institutional role and scope statements and in support of future data requirements for the statewide desegregation plan. Unlike the 1975 Survey, the current study will include student flow into the public senior institutions only and will add the dimension of student race. Note also that this information is for Fall 1981 only.

We ask that you refer the attached instructions and forms to the appropriate staff member at your institution. A return of the completed forms by October 23, 1981 would be appreciated. Any questions concerning the forms should be directed to Ms. Joan McGraw of our staff.

Thank you for your assistance in this matter.

WDC:ab

Attachments

INSTRUCTIONS FOR COMPLETING 1981 STUDENT SOURCE SURVEY

1. Information requested is for the Fall Term, 1981 only.

2. The data may be generated in identical format by computer.

3. On Forms A and B and Column One of Form J, the source of a first-time entering freshman is defined as the county, state or country of the permanent home address.

4. The total of Forms A, B and Column One of J should add up to the total (part-time and full-time) first-time entering freshman shown on the 1981 NCES Form 2300-2.3, Fall Enrollment in Institutions of Higher Education.

5. Forms C through G and Column Two of Form J request the source of undergraduate transfers to your institution. If a student attended more than one institution previous to transfer, the source is defined as the last institution from which the student received college credit.

6. Forms H, I and Column Three of Form J request the sources of first-time graduate students. (These figures will not coincide with the HEGIS Fall Enrollment 1981.) First-time graduate students are those attending your institution for the first time as graduate students regardless of the graduate work they may have previously completed elsewhere.

7. Form J collects information on sources of first-time freshmen, undergraduate transfers, and first-time graduate students from foreign countries. The assumption is made that these students are all non-resident aliens; therefore, no race breakdown is required on this form.

8. Please return this survey by October 23, 1981 to:

Joan E. McGraw
Staff Assistant
Commission on Higher Education
Suite 221, One Court Square
Montgomery, Alabama 36197
